

The logo consists of the word "ALGEA" in a bold, white, sans-serif font. On either side of the word are stylized white icons representing mountains or waves, each composed of three horizontal lines of increasing height.

THE ARCTIC COMPANY

ALGEA, THE ARCTIC COMPANY

Algea is a **Norwegian** company with a history of over **80 years**. It is one of the worldwide leading companies in the harvesting and manufacturing of seaweed-based products.

A WIDER VISION

“Meet humanity’s needs by using fewer resources, thanks to a new **Con-science** able to put science at the service of man through innovation and respect for nature.”

As a part of Valagro Group, Algea shares the same vision based on:

- **INNOVATION**
- **SUSTAINABILITY**
- **ETHIC**

MORE WITH LESS

We use **SCIENCE** to understand and make full use of **NATURE**'s potential while keeping a watchful eye on environmental sustainability.

Thanks to **Geapower** Technology, the development of our products follows a rigorous path:

1. Knowledge about and access to **raw materials**.
2. Careful selection of **extraction methods**.
3. Implementation of **investigative strategies**.
4. Solutions for the **intended use**.

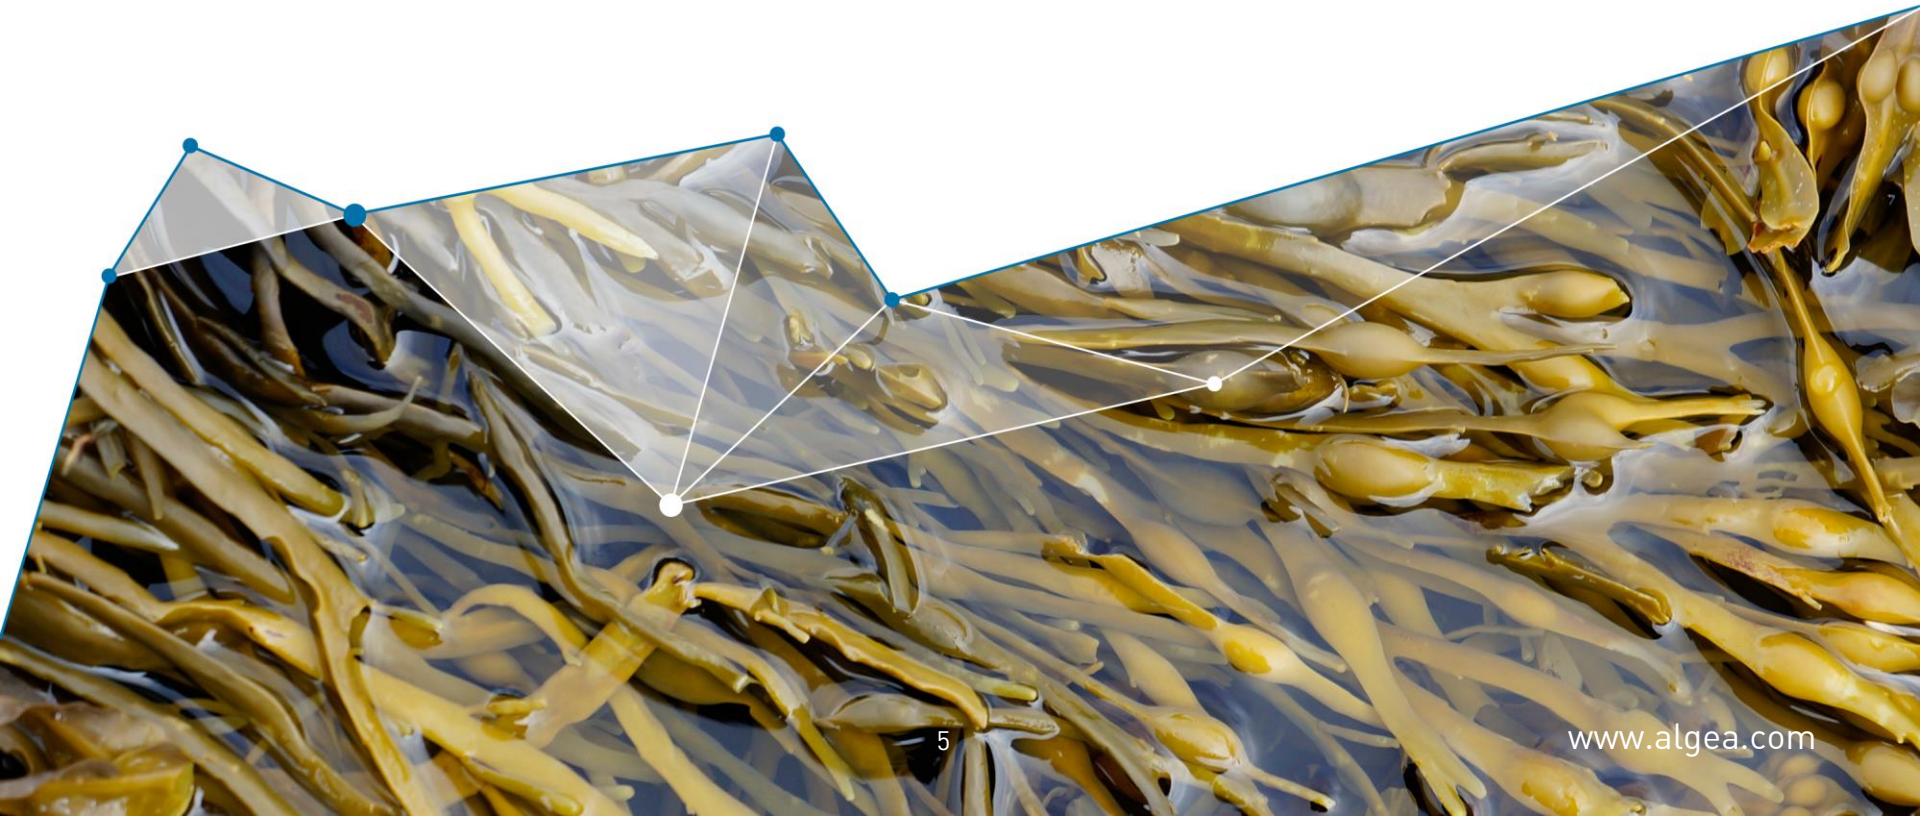

GEAPOWER
TODAY FOR TOMORROW

ARCTIC QUALITY SEaweeds

We harvest seaweeds directly in the clean and cold sea of Norway, selecting them responsibly, in full respect of natural cycles.

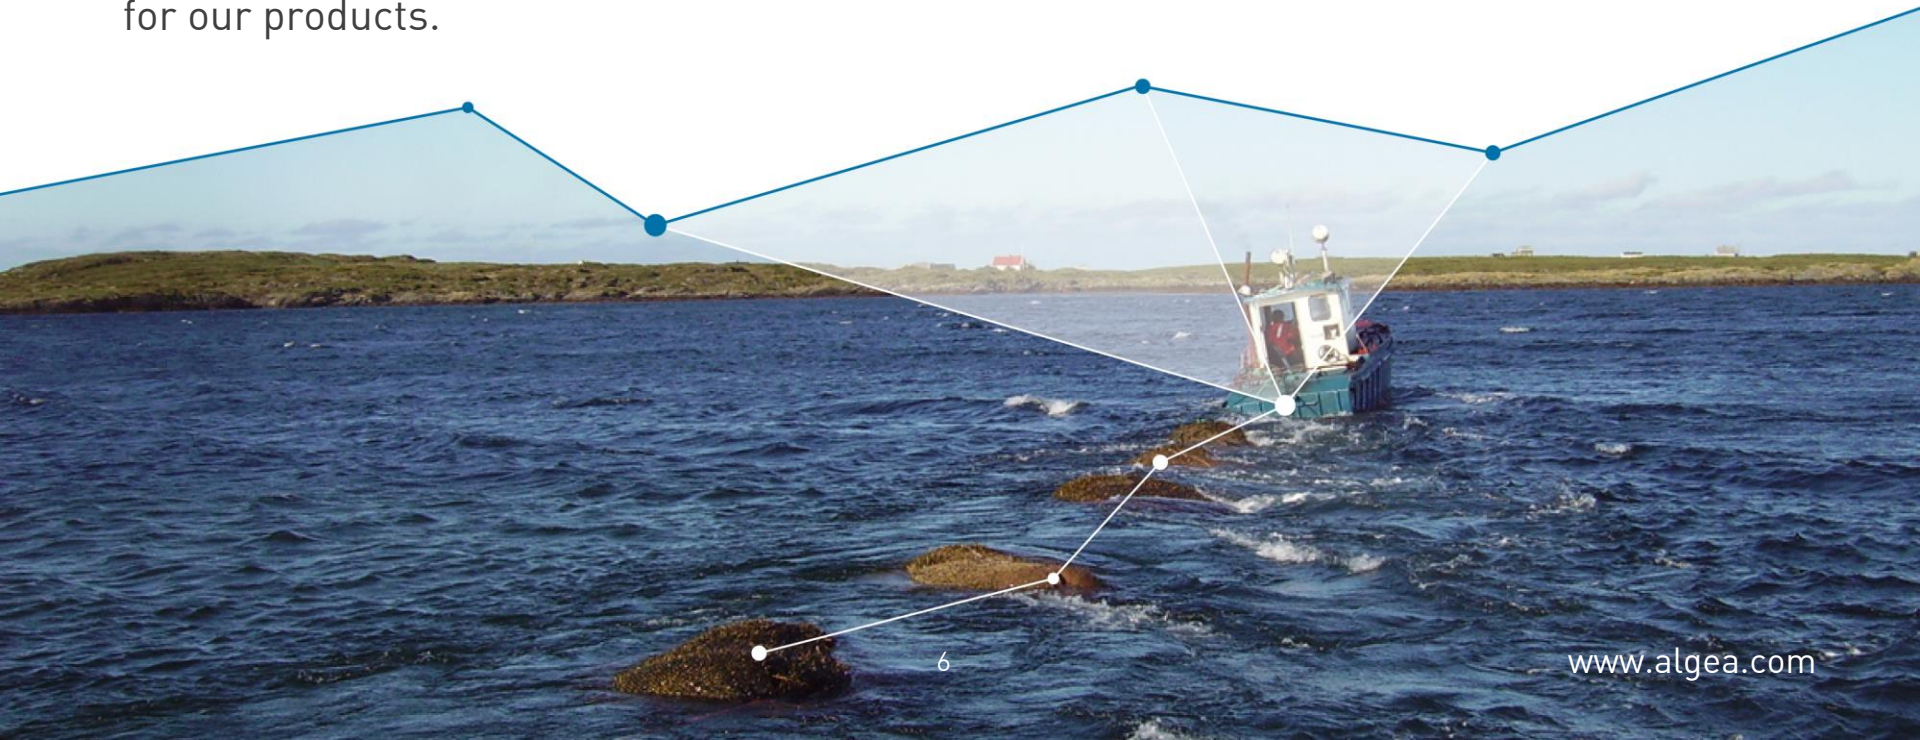

By growing in the **LAND OF THE MIDNIGHT SUN**, these special Arctic resources withstand both the winter frost and the unique light conditions of summer months, thus developing naturally some important chemical compounds.

SUSTAINABILITY: A DIFFERENT CONCEPT OF RESPECT

We have designed our own purpose-built **PROFESSIONAL HARVESTERS** in order to cut and gather seaweeds in a sustainable manner, thus allowing it to fully re-grow after 4-5 years.

Our **UNIQUE METHOD** is easy on the environment and ensures that only fresh seaweed (free from contamination like shells, sands and small stones) is used as raw material for our products.

INNOVATION IN ACTION

SCIENTIFIC INNOVATION in our company follows the principle “from nature to nature” that involves all our production processes and choices, not just the **INDUSTRIAL** ones.

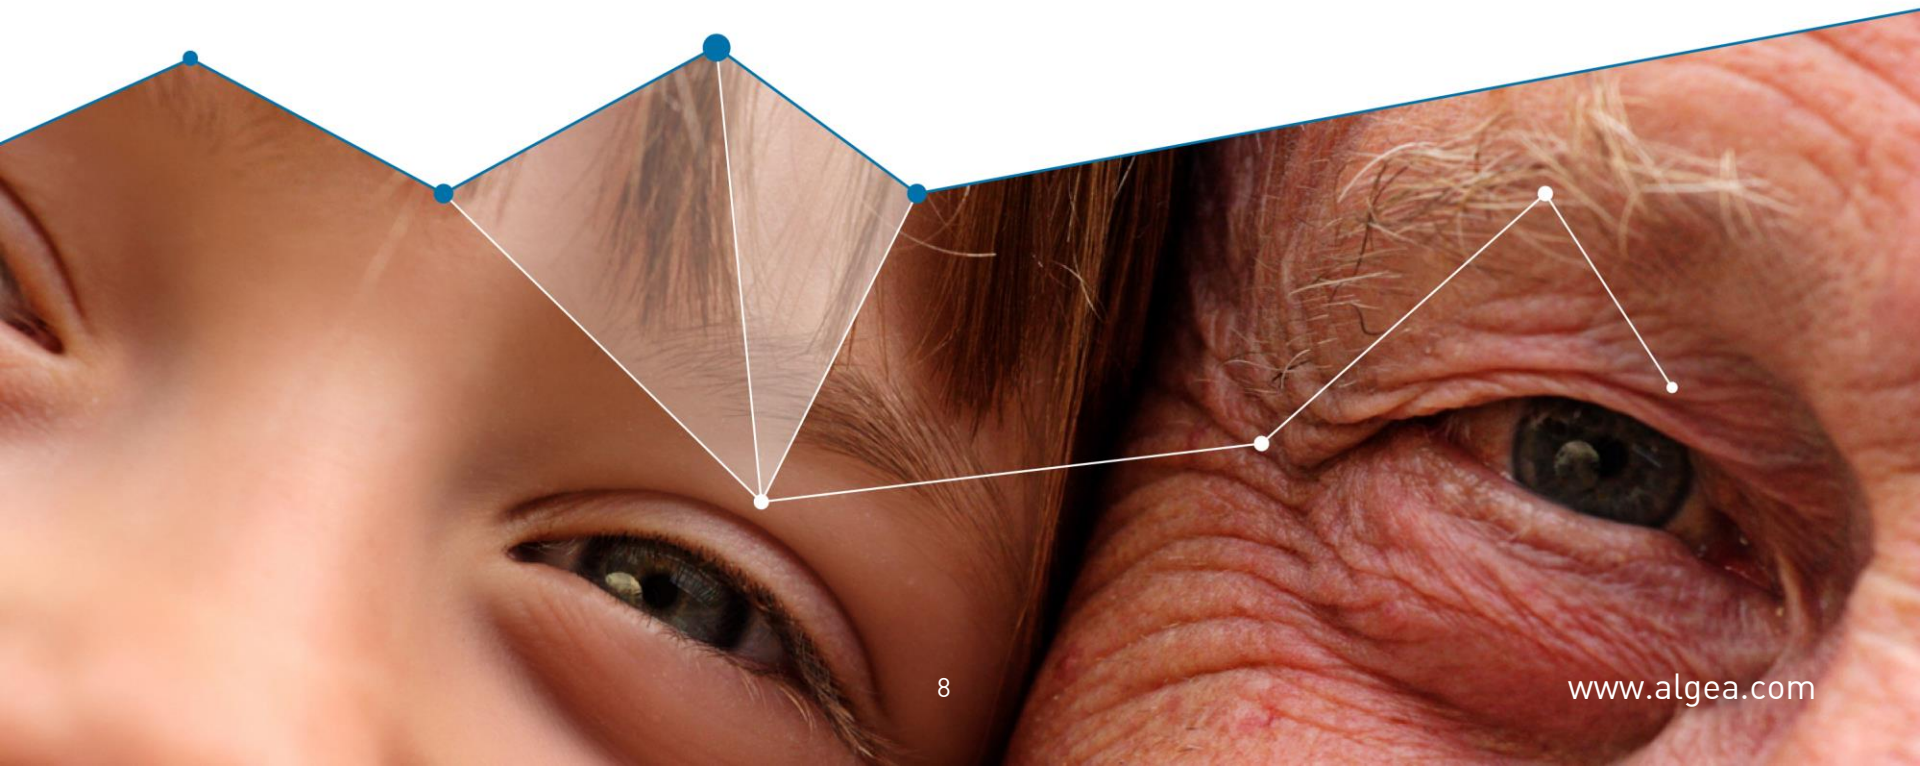

We have **THREE** cutting edge **PLANTS** in Norway, dedicated to different businesses. Our northern site is the only seaweed company located **ABOVE THE ARCTIC CIRCLE**. We developed processes that preserve the incredible characteristics of the seaweed and ensure the minimum environmental impact.

TRADITION AND ETHIC

We believe in **RESPONSIBILITY** as a value and in respect for people, cultures and environment. We deliver solutions that respect people, protect health and fulfill the desire for a better life.

We are **GRATEFUL TO PEOPLE** living on the Norwegian coasts. They have handed down **TRADITIONS** of seaweed use and enable a sustainable collection up to now.

CUSTOMER AT THE CORE

Our solutions have the **CUSTOMER** at the core.

We are a **B2B** company and we are organized in different businesses, offering specific products for different uses:

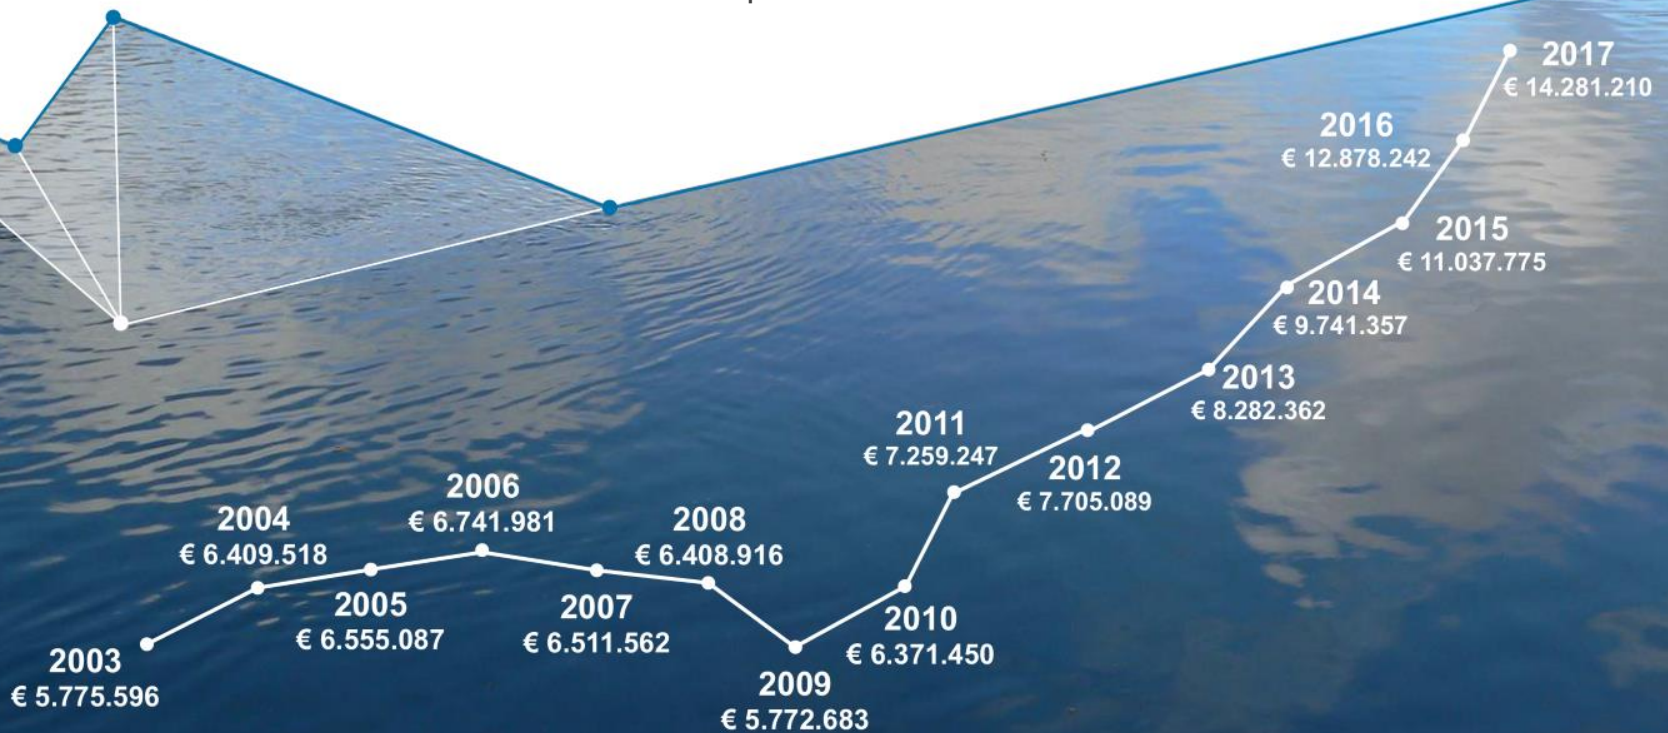

- **FERT**: High quality seaweed extracts for fertilizer manufacturers;
- **FEED**: Feed materials for companies operating in the animal feed sector.

PASSION FOR GROWTH

“We have always created with passion innovative and effective **SOLUTIONS** for the nutrition, care and beauty of people, animals and plants. Starting from the best Arctic resources. With respect for all beings and the environment.”

What has not changed since 1937, and what will not change is the **PASSION** that motivates us, the values that sustain this passion and the vision that feeds it.

Headquarter and Production Plant:

KRISTIANSUND, Omagata 78, 6517 Kristiansund - Norway

Production Plant:

BRONNOYSUND, Biskopholmen, 8900 Bronnoysund - Norway
